usage and in the media, "computer intruders" or "computer criminals" is the exclusive meaning of the word today.
(For example, "An Internet 'hacker' broke through state government security systems in March.") In the computer
enthusiast (hacker culture) community, the primary meaning is a complimentary description for a particularly
brilliant programmer or technical expert. (For example, "Linus Torvalds, the creator of Linux, is considered by
some to be a hacker.") A large segment of the technical community insist the latter is the "correct" usage of the
word (see the Jargon file definition below).
